

Erin Ingram earned her Master's in 2013 studying honey bee toxicology at UNL. She has been assisting in the teaching at beginning and master beekeeping classes since 2012. She is currently pursuing a doctoral degree at [UNL's Department of Entomology](#) examining the use of insects in high school biology classrooms.

(see Erin's slide show at <http://www.nebraskaswcs.org/past-events---information.html>, which has links to references used in her presentation)

Peter Berthelsen has been an employee of Pheasants Forever, Inc. for 24 years and is currently the Director of Habitat Partnerships. In [Nebraska, Pheasants Forever's](#) 65 local chapters and 11,000 members have spent millions delivering the organization's habitat and youth education mission by working directly with private landowners to establish habitat projects and resource agencies in unique partnerships in the state.

Nebraska Pheasants Forever's Past *Habitat Tip* Video Catalogue (many of which emphasize pollinator benefits of wildlife habitat):
